## Reptiles

Turtles, snakes and lizards are reptiles. Reptiles are characterized by dry scaly skin and clawed feet. Unlike amphibians, they do not have a dependence on water for their lifecycle.

- Broad-headed Skink
- Northern Fence Lizard
- Common Five-lined Skink
- Eastern Painted Turtle
- Box Turtle
- Snapping Turtle
- Wormsnake
- Cornsnake
- Eastern Hog-nosed Snake
- Rough Greensnake
- Queen Snake
- Northern Watersnake
- Milksnake
- Eastern Ratsnake
- Northern Black Racer
- Eastern Gartersnake
- Northern Ring-necked Snake
- Northern Copperhead\*\*
- Timber Rattlesnake\*\*

\*\*venomous species

## Amphibians

Frogs, toads and salamanders are amphibians. Amphibians are characterized by moist, smooth skin and no claws. They typically depend on moisture for the completion of their lifecycle as well as survival. Most can be found in damp places such as creek or lake edges.

- Red-spotted Newt
- Mountain Dusky Salamander
- Northern Spring Salamander
- Northern Red Salamander
- Northern Slimy Salamander
- Northern Red-backed Salamander
- Seal Salamander
- Jefferson Salamander
- Spotted Salamander
- Pickerel Frog
- Green Frog
- Wood Frog
- American Bullfrog
- Spring Peeper
- Grey Tree Frog
- Upland Chorus Frog
- American Toad
- Fowler's Toad
